The diagram shows a 2D hexagonal lattice with a central blue region labeled 'FFL BMT' and three red regions labeled 'GAR', 'WDK', and 'OFF'. The lattice is bounded by red lines on the left and bottom, and blue lines on the top and right. Numerical values are placed at the vertices of the hexagons. The top boundary has values 16, 11, 16, 11, 16, 11. The right boundary has values 22, 26, 26, 18, 18, 9. The bottom boundary has values 2, 18, 18, 9, 18, 9. The left boundary has values 20, 24, 24, 20, 24, 24. The central hexagon has values 16, 11, 16, 11, 16, 11. The 'GAR' hexagon has values 20, 24, 24, 20, 24, 24. The 'WDK' hexagon has values 16, 11, 16, 11, 16, 11. The 'OFF' hexagon has values 18, 9, 18, 9, 18, 9.

A photograph of a single-story house with a garage and a red car parked in front. The house has a chimney and a satellite dish on the roof. The driveway is covered in snow and ice, and there are trees in the background.
