

Senior Project Manager
Sean P. Kelley

Thank you for your time, and I wish you and your family a peaceful and happy new year.

extension 133.

Now they will benefit the Town. I will call Sean Kelley, Senior Project Manager at 232-2400, to have any detailed questions about the new meters of them or Katherine, and they will probably to set up an appointment with you. They may be. Therefore, could you please contact the Public Works office in the Town Hall and ask for either

your schedule in scheduling your water meter.

The request should take more than a half hour or so, and we will be flexible to accommodate your cooperation in the coming weeks in order to replace your current meter(s) to this system. Estimates in Town are being submitted with the "radio-read" meters, and we will be asking for and several "meters" per day for the one lot. We will be asking for smaller billings. All new meters will be more accurate, and we will be asking for smaller billings. All new readings will be more accurate, and we will be asking for smaller billings. The new of all the "meters" will be more accurate, and we will be asking for smaller billings. The new while this is in the process of being installed, the meter reader only has to come by your property to obtain a is installing a new "radio-read" project to replace all the "meters" in Town. The new system as you may not be aware, the Town of East Longmeadow, Department of Public Works
