Design Guidance

THE BULL RUN™ VALVE

The Bull Run Valve™ is designed to split flows to septic fields or systems. In addition to the advantages of longer life and easier installation it is the most public health safe alternating device available for wastewater disposal applications. The use has absolutely no contact with wastewater due to the valve's leak-proof and external operating characteristics. The change over from one drainage field to another can be accomplished in less than a minute by simply turning the valve without digging or contact with wastewater.

DESCRIPTION

BULL RUN VALVE 4"

BULL RUN VALVE & KEY ONLY

BULL RUN VALVE RISER W/ CAST COVER

BULL RUN VALVE KEY 28"

The Bull Run Valve is available in 4" sch 40 pvc and is suitable wherever septic disposal systems are used - in commercial, industrial, and residential applications.

OPERATING THE VALVE

The direction control handle should be rotated periodically to direct effluent to one or the other of two septic fields. After removing the screw cap at the top of the riser tube, the valve handle can be turned with the valve key furnished.

BULL RUN VALVE Complete Valve Kit Contains

1. Bull Run Valve body
2. 28" Valve Key
3. Riser Cap Adapter
4. Watertight Access Cap
